GUIDE TO THE FT6 THONGA FILE

/The FT6 Thonga File contains information on the Bantu-speaking Thonga of Mozambique. There are three sources in the file, two of which are different volumes of the same monograph. 1: Junod and 2: Junod, by a trained anthropologist-missionary, are the basic sources. 3: Rita-Ferreira is a bibliography of the Thonga by a Portuguese anthropologist. The volumes by Junod form one of the classics of descriptive ethnography and give a well-rounded picture of Thonga culture. The file as a whole is adequate for cross-cultural purposes, although material in depth will not be found as a general rule./

Processed in 1954-1967.
